1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that Applicant's arguments regarding the teachings regarding laser vaporization as taught by Curl "Collapse and Growth" and the invention disclosed in "Growth Morphologies" are persuasive. Specifically, Curl, "Collapse and Growth", teaches that increased yields of Buckminster fullerenes are produced when laser vaporization is employed. However, "Collapse and Growth" does not provide a teaching or motivation that employing laser vaporization in the invention of "Growth Morphologies" would have formed a rope comprising single wall carbon nanotubes having 50-5000 single wall carbon nanotubes of which greater than 10% are (10,10) single-wall carbon nanotubes and it would not have been predictable that combining the teachings would have formed a rope comprising single wall carbon nanotubes having 50-5000 single wall carbon nanotubes of which greater than 10% are (10,10) single-wall carbon nanotubes. Further, there would not have been a reasonable expectation of success that a rope comprising single wall carbon nanotubes having 50-5000 single wall carbon nanotubes of which greater than 10% are (10,10) single-wall carbon nanotubes would be formed by employing laser vaporization in the invention of "Growth Morphologies", since "Collapse and Growth" is drawn to increasing yields of Buckminster fullerenes which are structurally different than carbon nanotube ropes. Similarly, "Collapse and Growth" does not provide a teaching or motivation that employing laser vaporization in the invention of "Growth Morphologies" would have formed a felt comprising single wall carbon nanotubes wherein the single wall carbon nanotubes comprise ropes of single wall nanotubes, wherein greater than 10% of the

single wall carbon nanotubes are (10,10) single-wall carbon nanotubes and it would not have been predictable that combining the teachings would have formed a felt comprising single wall carbon nanotubes wherein the single wall carbon nanotubes comprise ropes of single wall nanotubes, wherein greater than 10% of the single wall carbon nanotubes are (10,10) single-wall carbon nanotubes. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The terminal disclaimer filed on 6/18/07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,969,504 has been reviewed and is accepted. The terminal disclaimer has been recorded.
